in the scope of delivery.

disty Programmieradapter

The Programmieradapter (PA) is designed for configuring the distyNotruf^{PRO} via a PC to users needs. This device is delivered as an accessory.

Operating instructions

To configure a **distyNotruf^{PRO}** connect the tag via the charging cable with the PA. Install the appropriate **distyProgrammer** app on the PC.

For handling the configuration, please refer to the operating manual of the **distyNotruf^{PRO}**. You can get this document, together with the software, from our homepage. After the configuration session it can be left connected to the PC or USB hub. The tag will be charged, if necessary.
